Which training session are you rating?	Rate this training session: [Description matched the contents of the class]	Rate this training session: [Class material was useful to my job]	Rate this training session: [Instructor was knowledgable]	Rate this training session: [Instructure was able to answer students questions]	Rate this training session: [Course material quality]	What was the single BEST part of this class?	Name one aspect of this class that NEEDS IMPROVMENT?
SA1: Using and Migrating to IPv6 / Huque	Exceeded Expectations	Met Expectations	Greatly Exceeded Expectations	Greatly Exceeded Expectations	Greatly Exceeded Expectations	The instructor was extremely knowledgeable with interesting theoretical and practical insights. Unfortunately, I didn't stay for the entire thing as I wanted to sit in on the Google Backup talk. Much to the instructor's credit, his presentation of the course material almost made me skip the backup talk.	Didn't stay the entire time, would be unfair to criticize.

But he did keep us one minute over! |
SA1: Using and Migrating to IPv6 / Huque	Greatly Exceeded Expectations	Greatly Exceeded Expectations	Greatly Exceeded Expectations	Greatly Exceeded Expectations	Greatly Exceeded Expectations	The whole thing - instructor rocked!	N/A
SA1: Using and Migrating to IPv6 / Huque	Greatly Exceeded Expectations	Greatly Exceeded Expectations	Greatly Exceeded Expectations	Greatly Exceeded Expectations	Greatly Exceeded Expectations	The breadth and depth of knowledge of the speaker was evident. Mr. Huque really knows what he's talking about. The huge amount of information packed into this half day was incredible!	Access to a recording of the session would be great. It was a lot of info, and having even an audio recording would be invaluable. And more comfortable chairs.
SA1: Using and Migrating to IPv6 / Huque	Greatly Exceeded Expectations	Greatly Exceeded Expectations	Greatly Exceeded Expectations	Greatly Exceeded Expectations	Greatly Exceeded Expectations	Shumon is a great speaker, and VERY knowledgeable about his subject! I also was happy to gift him with an IPv6Buddy (http://www.ipv6buddy.com/) which he was very excited about :)	Bigger font size on the slides -- he packs a lot of info on his slides, but it's hard to read on the screen... (great for offline reading though)
SA1: Using and Migrating to IPv6 / Huque	Greatly Exceeded Expectations	Greatly Exceeded Expectations	Greatly Exceeded Expectations	Greatly Exceeded Expectations	Greatly Exceeded Expectations	Shumon is a juggernaut. He may not be the most charismatic speaker but his material was very complete!	Shumon was light on details about Windows. He might want to consider adding more about it for the sake of desktop admins who might take his course.
SA1: Using and Migrating to IPv6 / Huque	Greatly Exceeded Expectations	Greatly Exceeded Expectations	Greatly Exceeded Expectations	Greatly Exceeded Expectations	Greatly Exceeded Expectations	in depth discussion	
SA1: Using and Migrating to IPv6 / Huque	Met Expectations	Met Expectations	Met Expectations	Met Expectations	Met Expectations		The amount of material is really tight for the time available. I would probably make this an afternoon class and try to expand the session time by 30-60 minutes.
SA1: Using and Migrating to IPv6 / Huque	Met Expectations	Exceeded Expectations	Greatly Exceeded Expectations	Greatly Exceeded Expectations	Exceeded Expectations		
SA1: Using and Migrating to IPv6 / Huque	Met Expectations	Met Expectations	Exceeded Expectations	Exceeded Expectations	Met Expectations	The instructor was obviously an expert in the subject matter and was able to convey essential concepts to a technically diverse audience.	The course should have been modified/tailored to match the time available. Time pressure seemed to disrupt the flow of the presentation.
